Individual Lash Extensions - Day Course

£295

Individual Lash Extensions are a semi-permanent beauty treatment which require ongoing maintenance every 2-3 weeks. They are a great add on to an already thriving Beauty Business or provide great flexibility as a stand alone treatment to fit around an existing job or busy family life.

Before attending your practical training day, this course has a theory-based element which can be accessed online as soon as your enrollment is complete. It is recommended that this should take around 7 hours to complete and must be done prior to attending your practical training day.

On this day course you will begin by learning your basic technique on a mannequin head before getting to work on a live model where you will then learn additional techniques and troubleshooting potential challenges when working on clients.

At FITFACE our Individual Lash Extensions practical training is different to a number of training providers who do not require you to work on a live model. We hear from so many students who are sent away from training courses having only ever used a mannequin head and then simply don't feel equipped with the skill and confidence needed to get that new lash business fired up as soon as you complete your course.
