Russian Volume Lash Extensions - Day Course

£300

In this course, we cover both Hybrid and Russian Volume Lash Extensions, including hand made fans vs pre-made. Hybrid and Russian Volume lashes have shot to popularity in recent years and offer a fuller, more tailored lash style than can be achieved with individual lashes alone. They are a great add on to an already thriving Beauty/Lash Business or provide great flexibility as a stand-alone treatment to fit around an existing job or busy family life. Similarly to Individual Lash extensions, Hybrid and Russian volume lashes require ongoing maintenance every 2-3 weeks.

Before attending your practical training day, this course has a theory-based element that can be accessed online as soon as your enrollment is complete. It is recommended that this should take around 7 hours to complete and must be done prior to attending your practical training day.

On this day course, you will begin by learning how to make and apply handmade fans before getting to work on a live model where you will then learn additional techniques including lash mapping and troubleshooting potential challenges when working on clients.

At FITFACE we aim for students to leave all of our courses feeling equipped with the skill and confidence needed to take your lash business to that next level as soon as you complete your course.
